OUR AGENDA
A Food Secure and Prosperous Africa

Find out more on; www.asareca.org
The Association for Strengthening Agricultural Research in Eastern and Central Africa (ASARECA) is an Inter-Governmental Organization created in 1994 and owned by the Governments of 15 Member States in Eastern and Central Africa (ECA) through their National Agricultural Research Systems (NARS). ASARECA’s overarching mandate is to Transform Agriculture for Improved Livelihoods, Sustained Economic Growth, and Inclusive Development in ECA in alignment with the Sustainable Development Goals (SDGs), Agenda 2063, Malabo Targets, and Country Strategies.

The Member States are: Burundi, Cameroon, Central African Republic, Democratic Republic of Congo, Ethiopia, Eritrea, Kenya, Madagascar, Republic of the Congo, Rwanda, Somalia, South Sudan, Sudan, Tanzania, and Uganda.

**ASARECA at a Glance**

ASARECA is mandated by Member States to strengthen, catalyze, facilitate and coordinate regional agricultural research for development (AR4D) to improve delivery of national and regional research-driven inclusive and sustainable agricultural transformation and development outcomes and impact in ECA through the following initiatives: (i) enhancing sustainable livelihoods for all; (ii) supporting value addition of selected commodities; (iii) enabling smallholder farmers to deal with climate change issues via climate smart agriculture; (iv) enhancing livelihoods among regional pastoral communities; (v) supporting Member States in development of Agricultural Development Plans; (vii) coordinating ASARECA Regional Agricultural Market Information System (A-RAMIS), and (viii) managing Agricultural Digital Transformation for Development (AgDT4D) Hub.

**ASARECA Mandate**

**ASARECA Vision**

A transformed ECA agriculture sector contributing to improved livelihoods, sustained economic growth and inclusive development.

**ASARECA Mission**

To contribute to increased productivity, commercialization and competitiveness of agriculture and sustainable food systems through strengthening, supporting and coordinating agricultural research for development in the ECA sub-region.
Major Benefits of Being an ASARECA Member State

**Political Benefits**

ASARECA creates a platform for Ministers, Permanent Secretaries and the Board of Directors from Member States to: (i) collectively formulate, execute, evaluate, and approve policies that apply to and benefit more than one Member State; (ii) lobby Development Partners to support Regional Priority Projects for generation of regional public goods; (iii) approve establishment and funding of Regional Centres of Excellence, Regional Centres of Leadership and National Centres of Specialization; and (iv) become part of decision-making organs on issues of Agricultural Research for Development in Eastern and Central Africa.

**Technical Benefits**

ASARECA provides: (i) platform for technical research exchanges; (ii) medium of consolidating technical experts to engage in national, regional, and continental decision-making forums on AR4D in Africa; (iii) podium for sharing national priorities and lessons learned that enable Member States identify quick solutions to their similar challenges; and (iv) opportunity for scientists to lead or co-lead a team of experts from other Member States, including being Chair of any of the ASARECA Communities of Practice.

**Socio-economic Benefits**

ASARECA facilitates Member States to: (i) transfer and disseminate research technologies, innovations, products, services, and goods, thus saving on cost, time, and other resources; (ii) implement regional projects that tackle joint regional challenges and cross-border issues; and (iii) have a platform for peer learning, exchange, mentorship, and exhibitions.
ASARECA Themes and Cross-cutting Issues

1. Capacity and Partnerships Development and Strengthening
2. Agricultural Transformation Technologies and Innovations
3. Enabling Policies, Functional Markets and Supportive Institutions
4. Knowledge Management and Information Communication

Environmental Sustainability
Gender Considerations
Youth Empowerment
HIV/AIDS, Malaria, Drug and Substance Abuse
Monitoring, Evaluation and Learning
ASARECA Targets by 2030

- **4.5 million** Farmers out of severe climate risks, including 1.5 million from pastoral communities
- **10 million** Farmers adopting anti-food loss and waste technologies and innovations
- **5%** Increase in quantity of fertilizer used by small-holder farmers

- **150,000 hectares** Land rehabilitated
- **25%** Farmers accessing healthy seeds and planting materials

- **10 million** Children & mothers accessing sufficient, safe & nutritious foods using biofortification initiatives

- **15,000** Train human resources in agriculture for food and nutrition security
- **50 million** Stakeholders accessing ASARECA knowledge platforms and products
- **3%** Increase in youth employment in agribusinesses

**Coordinate**

- Policy analyses: 100
- Policy dialogues: 50
- Policies approved: 22
- Policies implemented: 10

**Enforcement of standards on agrochemicals** to prevent contamination from hazardous chemicals
300,000
People (60% women) utilizing nature-based solutions in management of land, soil, water and biodiversity

75%
Increase in household incomes from US$ 800 to US$1400

7.5 Million
Farmers (60% women) who have utilized new TIMPs

Facilitate generation of 350 TIMPs & Scaling of 500 TIMPs

5 million
Farmers (60% women) diversifying production of priority commodities

2.25 Million
Farmers linked to local and regional market

47 Million
47 Million farmers directly and indirectly reached through ASARECA interventions (60% women) from 42 Million

2.6 Million
MT of agricultural products traded (35,000 MT per country per year)

5%
Facilitate 5% increase in intra and inter-country trade volumes for priority commodities

102,000
Stakeholders whose capacity building needs have been addressed

375
Youth in ASARECA member countries supported to engage in gainful agribusiness

187,500
Farmers using mechanized agriculture in their farming operations

114,000
People (60% women) utilizing nature-based solutions in management of land, soil, water and biodiversity
Issues: Major AR4D Challenges and solutions in Eastern and Central Africa

AR4D Challenges

Capacity gaps
- Capacity gaps in diverse fields in the food systems.
- Limited capacity in implementation of Agricultural ICT.
- Limited capacity to deal with effects of climate change & adoption of climate-smart agriculture

Policy gaps
- Skewed policy cycles on foresight, policy analyses, approval and implementation.
- Staggered market access by different smallholder farmers.
- Increased incidences of fragility and conflicts in some Member States.
- Gender inequality in almost all Member States.
- Incoherence in policies, which limit economies of scale for AR4D technology generation & transfer.

Technology gaps
- Limited value addition of major value chains.
- Limited commercialization of proven agricultural food technologies and innovations.
- Imbalanced demand and supply of new, superior homegrown technologies and innovations.
- Weak interaction between the private sector and farmers.
- Decreased agricultural productivity and access to seed and fertiliser.

AR4D Solutions

- Providing and facilitating tailored capacity strengthening initiatives identified in ASARECA Capacity Strengthening Plan.
- Establishing centres of excellence in given commodities and other AR4D specialisations in Member States.
- Promoting smart agriculture on smart farms using proven technologies and innovations.
- Enhancing knowledge building by operating data collection, dissemination of best practices, and brain gain.
- Tightening regional integration via trade promotion, joint policy implementation, and harmonization of standards.
- Facilitating private sector network for enhanced trade and commercialization of TIMPs.
- Enhancing ICT-based regional AR4D environment.
- Coordinating actions aimed at addressing threats of climate change.
From Uganda:
- Botanical seeds with enhanced β carotene and NASE 14 high-yielding cassava varieties shared with Kenya, Ethiopia, Tanzania, DRC, Rwanda, South Sudan, Burundi, Malawi, and Mozambique.
- Cassava clones shared with Kenya, Tanzania, Burundi, DRC, Rwanda, South Sudan and Nigeria.
- NAROCAS1 variety shared with Kenya, Tanzania, Burundi, DRC, Rwanda, South Sudan, Nigeria, Malawi and Mozambique.
- Improved cassava sprouting technology shared with Ethiopia.

From Kenya:
- Cassava germplasm shared with Uganda, Tanzania, Mozambique and Malawi.

From Tanzania:
- 6 new rice varieties TXD 306 (Saro 5) and five other varieties shared with Kenya.

From Tanzania via IRRI:
- 20 varieties shared from Tanzania for evaluation. IRRI shared Komboka evaluated and released varieties with Kenya, Uganda, Ethiopia, Zanzibar, Malawi.

From Kenya:
- 2 rice varieties shared over to South Sudan, Ghana and Senegal.

From Uganda:
- Rice flower emasculator machine for crossbreeding shared with Tanzania, Kenya, South Sudan and Nigeria.
- Released rice variety (Namche 1, 2, 3, 4 & 5) availed to Tanzania, Kenya, Ethiopia, Rwanda, Burundi, DRC, Egypt, South Sudan, Senegal and Ghana.
Movement of Dairy Technologies Across Borders

From Kenya:
- 4 clones of Napier Grass that are high yielding and disease resistant to head smut and stunt shared with Uganda, Burundi, Rwanda and DRC.
- An assortment of assisted reproductive technologies including semen from bulls for dairy cattle shared with Tanzania, Burundi, Rwanda, Uganda, Ethiopia, Burundi, Zanzibar and Rwanda.
- 1 tube silage-making technology shared with Uganda, Tanzania and Mozambique.
- Improved diary breeds germplasm shared with Tanzania, Uganda, Ethiopia and Mozambique.
- Crop residue (maize and molasses) utilisation protocols shared with Tanzania Mozambique.
- Forage suitability maps shared with Uganda and Tanzania.
- State of the art lab equipment shared with Ethiopia, Tanzania and Uganda.
- Animal health and zoonotic disease management protocols shared with Uganda and Ethiopia.
- Animal feed and milk safety practices shared with Tanzania and Uganda.
- Milk value addition and marketing innovations with Tanzania, Ethiopia, Mozambique, DRC, Egypt, South Sudan, Senegal and Ghana.

From Ethiopia:
- A full package of East African wheat improvement nurseries shared with Kenya, Tanzania and Uganda.

From Kenya:
- 5 wheat varieties (Kingbird, eagle 10, kwale, robin) resistant to UG99 wheat virus shared with Ethiopia, Tanzania and Uganda.
- Standard protocols in grain quality analysis shared with Uganda.
- Standard protocols in regional disease scoring for wheat rust shared with: Uganda, Tanzania, Ethiopia, Mexico, Burundi, Rwanda, India and Sudan.
- Wheat varieties shared with Kenya.
- 4 wheat varieties including impala shared with Cameroon.
**Regional Cassava Centre of Excellence**

The Cassava RCoE provided capacity building and training through PhD supervision, Msc and short courses to scientists, students and staff from Kenya, Tanzania, Ethiopia, DRC, Rwanda, Burundi, Cameroon, Ghana, Ivory Coast and Mozambique.

**Regional Rice Centre of Excellence**

Under the rice Centre of Excellence headed by Tanzania, Uganda provided training to 7 Msc students from Tanzania, Uganda, Kenya and Liberia.
Strengthening of Dairy Research Capacities Across Borders

Dairy Centre of Excellence (Kenya) provided training and supervision for 44 Phds, 105 Msc, 1,019 short courses, which were offered to Uganda, Tanzania and Ethiopia.

The RCoE also provided access to training and use of hi-tech lab facilities to technicians, students and researchers from Uganda, Tanzania and Ethiopia.

Transfer and Dissemination of Quality Protein Maize

ASARECA promoted the rapid scaling-up of Quality Protein Maize, reputed for its protein value.

Achievements

- QPM was adopted as a major ingredient in regular diets for over 800,000 people, mainly malnourished children, and lactating mothers.
- Breeder seed for varieties promoted by the project including LONGE 5 for DR Congo and Uganda, and LISHE K1, LISHE H1, and LISHE H2 for Tanzania were produced and disseminated.
ASARECA promoted climate-smart initiatives to improve the resilience of smallholder farmers to climate change.

**Achievements**
- 200,000 people accessed water harvesting, small-scale irrigation facilities and labour saving innovations.
- Soil fertility improved, leading to an increase in crop yields from 22 to 44 t/ha.
- Fodder yield increased by 2%, milk by 78% and vegetables by 500%.
- Household income increased by 66%.

Promoted adoption of OFSP technology to improve livelihoods by increasing production, consumption & marketing.

**Achievements**
- 12 high yielding, nutritious OFSP varieties adopted in the 5 countries.
- OFSP improved the food and income security for over 800,000 vulnerable communities.
- 2,000 ha were put under multiplication of OFSP varieties.
**Work in Biotechnology – Fighting CBSD**

Countries affected: Uganda (100% crop loses), Kenya (5-100%), Tanzania (80%): Spillovers: Rwanda, Burundi, Sudan, Malawi, Ethiopia

ASARECA coordinated efforts by NARIs and international partners to:
- Promote use of resistant varieties
- Study the spread of the disease
- Generate information to control spread.

**Achievements**
- Researchers adopted use of resistant varieties as long term control strategy.
- Existing relatively tolerant varieties multiplied and distributed to farmers.
- CBSD was subdued.
- Uganda’s Cassava Centre of Excellence hosted by Uganda, advanced progress in finding CBSD resistant varieties

**Biotechnology – Fighting Striga**

Over 47,000 ha of sorghum infested by Striga, leading to yield losses of up to 2.3 million metric tons annually. ASARECA coordinated efforts to fight Striga by deploying resistance genes to boost sorghum productivity & enhancing sorghum adaptability to climate change.

**Achievements**
- 51 lines of striga-resistant sorghum varieties generated using molecular marker breeding technology.
- 4 lines code named ASARS1, ASARS2, ASARS3, ASARS4, released in Sudan.
ASARECA Board of Directors

Dr. Geoffrey Mkamilo, Director General, Tanzania Agricultural Research Institute (TARI) - Tanzania
Chairperson Board of Directors

Ambassador Dr. Kipiyego Cheluget, East African Community & Representative of the RECs in the Board
Vice-Chairperson

Dr. Enock Warinda
Executive Director - ASARECA
Secretary to the Board

Dr. Yona Baguma
Director General, National Agricultural Research Organization (NARO) - Uganda
Chairperson, Audit and Risk Management Committee

Dr. Eliud Kireger
Director General & Chief Executive Officer, Kenya Agriculture and Livestock Research Organisation (KALRO) - Kenya
Chairperson, Resource Mobilisation Committee

Prof. Patience Mushenga
Deputy Director of Agriculture, Egerton University - Kenya & Representative of Universities in the Board
Chairperson, Finance Committee

Dr. Alfred Niyokwishimira
Director General, Institut des Sciences Agronomiques du Burundi (ISABU) - Burundi
Chairperson, Programmes Committee

Dr. Telesphore Ndayambamwe
Director General, Rwanda Agriculture & Animal Resources Development Board - Rwanda
Chairperson, Nominations & Governance Committee

Prof. Abdelmoneim Taha
Director General & Head Monitoring & Evaluation, Agricultural Research Corporation (ARC), Sudan
Member

Dr. Feto Esimo
Director General, Ethiopian Institute for Agricultural Research (EIAR) - Ethiopia
Member

Prof. Aimé Lala Razafinjara
Director General, National Center for Applied Research in Rural Development (FOFIFA), Madagascar
Member

Dr. Steve Dieudonne Mbenda
Director-General, Institut Centrafricain de Recherche Agronomique (ICRA) - Central African Republic
Member

Dr. Noé Woin
Director General, National Agricultural Research Institute (IRAD) - Cameroon
Member

Ms. Regina Kayitesi
East African Community, Private Sector Representative
Member

Dr. Tsegay Berhane
Director General, National Agricultural Research Institute (NARI) - Eritrea
Member

Dr. George Tokporo Tadu
Director General, Ministry of Agriculture and Food Security (MAFS) - Republic of South Sudan
Member

Mr. Auguste Emmanuel Issali
Director General, National Institute for Agronomic Research (IRA) - Republic of the Congo
Member

Mr. Darrell Sextone
European Union Representative of Development Partners

Dr. Dominique Kankonde
Director General, National Institute of Agricultural Studies and Research (INERA) - Democratic Republic of Congo
Member

Mr. Abdi Mohamed Hussein
Director General, Ministry of Plant Protection and Research, Ministry of Agriculture and Irrigation - Somalia
Member
ASARECA’s Strategic Platforms

- ASARECA Policy Makers Network (A-PMN)
- ASARECA Private Sector Network (A-PSN)
- ASARECA Climate-Smart Agriculture Alliance (A-CSAA)
- ASARECA Regional Priority Projects (A-RPPs)
- ASARECA Knowledge and Information Hub (KI-Hub)
- Agricultural Digital Transformation for Development (AgDT4D) Hub
